

CS101: Lab #18

Arrays Part III

Included with this lab are four source code files.

- `Card` gives a standard representation for a card.
- `Deck` represents a standard 52-card, 4-suit deck of cards.
- `Lab18` implements the main method for visual testing (by printing to the console).
- `DeckException` is a simple exception class to be used if dealing from a deck of cards goes awry.

Complete the methods as described in the `Deck` class.
